## Counties and census divisions

To provide a means of presenting statistical data for permanent areas within a province, counties and census divisions are used in compiling many of the results of the census. Since electoral districts are subject to change after each census, areas with fixed boundaries are used as a basis for compilation of the census to permit comparisons of data with other census years for areas smaller than a province.

In the eastern provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario, counties are used for this purpose. The four western provinces and Newfoundland, where there are no fixed political divisions corresponding to counties, have been divided for statistical purposes into census divisions. These census divisions have been so laid out that as population increases, they may be subdivided without destroying the means of comparing the variations in population, agriculture, etc., disclosed by succeeding censuses.

There have been no changes in the county or census division boundaries of the majority of provinces since the census divisions of the western provinces were first established at the time of the 1921 Census. In the Province of Quebec, however, a number of "municipal" counties have been created which sub-divide some of the original or "census" counties. These new counties are indicated as subheadings of the original counties on the provincial map shown for Quebec.

A number of other boundary changes in the counties of the Province of Quebec have been made in fairly recent years. It has not been possible to follow these changes in every case, for the reason that it would be impossible to make comparisons with earlier censuses for these counties. Such departures from the boundaries of municipal counties as have been necessary because of this fact are shown in the list of municipalities and parts of municipalities in Table 6 of this Volume at the conclusion of the Quebec portion of the table. This list identifies each municipality or part as to its "census" and "municipal" county location.

In the Province of Ontario, in addition to the 43 census counties in the southern parts of the Province, there are 11 territorial districts in northern Ontario which for census purposes are shown as counties. These districts are indicated in the legend of the index map for Ontario shown on a later page. Whereas in the Province of Quebec certain counties have been subdivided for municipal purposes, the reverse has occurred in Ontario where a number of counties have been united for this reason (e.g., the county of Durham & Northumberland). These differences from "census" counties are also indicated in the legend of the map for Ontario.

## Census Subdivisions

In Tables 5, 6, 7, 23 and 41 of this Volume, population data are shown not only for the counties and census divisions of each province, but also for the subdivisions of these areas. As can be observed from these tables and from certain of the provincial refer-

## APPENDICE A - CARTES DE RÉFÉRENCE

## Comtés et divisions de recensement

Pour présenter des données statistiques à l'égard des régions permanentes d'une province, on se sert des comtés et des divisions de recensement dans la préparation d'un grand nombre de résultats du recensement. Comme les circonscriptions électorales sont sujettes à être modifiées après chaque recensement, on prend comme base des régions à limites constantes, afin de permettre des comparaisons des données avec les autres recensements, dans le cas des régions moins étendues qu'une province.

Dans les provinces de l'Est, l'Île du Prince-Édouard, la Nouvelle-Écosse, le Nouveau-Brunswick, le Québec et l'Ontario, les comtés sont utilisés à cette fin. Les quatre provinces de l'Ouest et Terre-Neuve, ne possédant pas de divisions politiques déterminées qui correspondent aux comtés, ont été divisées aux fins de statistique en divisions de recensement. Ces divisions de recensement ont été établies de façon telle qu'à mesure que la population augmentera, elles pourront être subdivisées sans que soient détruits les moyens de comparaison des variations de population, agriculture, etc., révélées par les recensements subséquents.

Il n'y a eu aucun changement aux limites des comtés ou divisions de recensement de la majorité des provinces, puisque les divisions de recensement des provinces de l'Ouest ont été établies à l'époque du recensement de 1921. Dans la province de Québec, toutefois, on a créé un certain nombre de comtés "municipaux" qui subdivisent quelques-uns des comtés initiaux ou "de recensement". Ces nouveaux comtés sont indiqués comme sous-titres des comtés antérieurs sur la carte provinciale du Québec.

Ces dernières années, un certain nombre d'autres modifications ont été apportées aux limites des comtés de la province de Québec. On n'a pu tenir compte de ces modifications dans chaque cas, parce qu'il serait impossible d'établir des comparaisons avec les recensements antérieurs à l'égard de ces comtés. Cet écart nécessaire des limites des comtés municipaux est indiqué dans la liste des municipalités et parties de municipalités, tableau 6 du présent volume, à la fin de la partie du tableau relative au Québec. Cette liste identifie chaque municipalité ou partie de municipalité selon sa situation dans le comté de "recensement" et le comté "municipal."

La province d'Ontario compte, en plus des 43 comtés de recensement du sud de la province, 11 districts territoriaux du nord qui, aux fins du recensement, sont désignés comme comtés. Ces districts sont indiqués dans la légende de la carte indicatrice de l'Ontario qui paraît plus loin. Tandis que dans la province de Québec, certains comtés ont été subdivisés à des fins municipales, le contraire s'est produit dans l'Ontario, où un certain nombre de comtés ont été réunis pour la même raison (ex.: les comtés de Durham et Northumberland). Ces différences dans les comtés de "recensement" sont également indiquées dans la légende de la carte d'Ontario.

## Subdivisions de recensement

Dans les tableaux 5, 6, 7, 23 et 41 du présent volume, les données relatives à la population paraissent non seulement pour les comtés et divisions de recensement de chaque province, mais aussi pour les subdivisions de ces régions. Comme on peut le remarquer en consultant ces

ence maps in this Appendix, the types of subdivisions vary among provinces. The main differences are explained in the following sections.

**Newfoundland.**— Census divisions and subdivisions were established in the Province of Newfoundland prior to the 1951 Census, following the union of Newfoundland and Canada in 1949. In the majority of cases, the subdivisions consist of areas which are not municipally organized, although some include incorporated cities and towns within their boundaries.

**Prince Edward Island.**— The subdivisions of the counties of Prince Edward Island consist of a number of townships and two royalties, as well as one city and a number of incorporated towns. The townships and royalties are shown on the reference map for Prince Edward Island, and are numbered according to their official designations as shown in the tables.

**Nova Scotia.**— Previous to the 1951 Census the subdivisions used in the counties of Nova Scotia apart from the incorporated cities and towns were mainly polling subdivisions or groups of polling subdivisions which had no official boundaries. Because of the lack of comparability of the statistics from census to census on this basis, the subdivisions as outlined on the reference map for this Province were established for census purposes prior to the 1951 Census. In the few counties for which local municipal districts have been set up, the census subdivisions were made to coincide with their boundaries (e.g. Subdivision A of Digby County comprises Clare Municipal District and Subdivision B, Digby Municipal District).

**New Brunswick.**— The subdivisions of the Province of New Brunswick apart from the incorporated cities, towns and villages consist of parishes. These parishes are outlined on the reference map for New Brunswick and are numbered in consecutive order within the counties in the order in which they appear in the tables of this Volume.

**Quebec.**— The subdivisions of the counties of Quebec used for the publication of census statistics are municipalities which have been organized from parishes, municipalities which have been organized from townships, municipalities without designation, and also a few individual parishes where these have not been organized as municipalities. On the reference map for Quebec, however, it is not possible to show the boundaries of these subdivisions.

**Ontario.**— In the Province of Ontario, the subdivisions of counties shown in census tables are mainly townships. In a few counties a number of improvement districts have been established in recent years. As in the case of Quebec, the map for Ontario does not show these subdivisions of counties.

— tableaux et certaines des cartes de référence des provinces du présent appendice, le genre des subdivisions varient d'une province à l'autre. Les principales différences sont expliquées dans les sections subséquentes.

**Terre-Neuve.**— Les divisions et subdivisions de recensement ont été établies à Terre-Neuve avant le recensement de 1951, à la suite de l'union de cette province au Canada en 1949. Dans la majorité des cas, les subdivisions se composent de régions qui ne sont pas organisées au point de vue municipal, bien que quelques-unes d'entre elles comprennent dans leurs limites des cités et villes constituées.

**Île du Prince-Édouard.**— Les subdivisions des comtés de l'Île du Prince-Édouard se composent d'un certain nombre de townships et de deux royalties, ainsi que d'une cité et d'un certain nombre de villes constituées. Les townships et les royalties sont indiqués sur la carte de référence de l'Île du Prince-Édouard et sont numérotés d'après leur désignation officielle dans les tableaux.

**Nouvelle-Écosse.**— Avant le recensement de 1951, les subdivisions des comtés de la Nouvelle-Écosse, abstraction faite des cités et villes constituées, étaient principalement des subdivisions ou groupes de subdivisions de scrutin qui n'avaient aucune limite officielle. Comme les statistiques établies d'après de telles divisions ne pouvaient être comparées d'un recensement à l'autre, les subdivisions telles qu'elles paraissent sur la carte de référence de cette province ont été constituées aux fins du recensement avant le recensement de 1951. Dans les quelques comtés pour lesquels des districts municipaux ont été établis, on a fait coïncider les divisions de recensement avec leurs limites (ex.: la subdivision A du comté de Digby comprend le district municipal de Clare et la subdivision B, le district municipal de Digby).

**Nouveau-Brunswick.**— Les subdivisions du Nouveau-Brunswick, outre les cités, villes et villages constitués, se composent de paroisses. Ces paroisses sont indiquées sur la carte de référence du Nouveau-Brunswick et sont numérotées à l'intérieur des comtés dans un ordre consécutif, l'ordre dans lequel elles paraissent dans les tableaux du présent volume.

**Québec.**— Les subdivisions des comtés du Québec utilisées pour la publication de la statistique du recensement sont des municipalités qui ont été constituées de paroisses, des municipalités qui ont été constituées de townships, des municipalités sans désignation et quelques paroisses, lorsque celles-ci n'étaient pas érigées en municipalités. Il est toutefois impossible d'indiquer les limites de ces subdivisions sur la carte de référence de la province de Québec.

**Ontario.**— Dans la province d'Ontario, les subdivisions de comtés indiquées dans les tableaux du recensement sont principalement des townships. Dans quelques comtés un certain nombre de districts d'amélioration ont été établis ces dernières années. Comme dans le cas du Québec, la carte d'Ontario n'indique pas les subdivisions des comtés.

**Manitoba.**— The subdivisions shown for Manitoba are municipalities and local government districts. Their boundaries are outlined on the map for Manitoba, and for reference purposes each subdivision has been numbered within the census division in the same order in which it appears in the tables of this Volume.

**Saskatchewan.**— The subdivisions in Saskatchewan are municipalities and local improvement districts. As a guide to their locations, the official numbers of these subdivisions appear on both the tables of this Volume and the reference map for Saskatchewan.

**Alberta.**— The subdivisions of Alberta are municipal districts and improvement districts. These districts are shown on the Alberta reference map in this Appendix according to their boundaries at the 1941 Census. It has been necessary to use the 1941 boundaries in the compilations of the 1951 Census due to the extensive reorganizations of these districts in the past few years. It was not possible to incorporate these changes in the planning of the enumeration areas and the tabulations of the 1951 Census and maintain comparability with previous censuses. A special table compiled to show the population of Alberta according to the municipal units as they were organized at the date of the 1951 Census is shown in Appendix B, together with a map outlining their boundaries as of June 1, 1951.

**British Columbia.**— The census divisions and subdivisions of the Province of British Columbia were established in 1931. From Table 7, for example, (see Page 7-44), it will be noted that the subdivisions outlined on the reference map for British Columbia, apart from the incorporated cities and villages, consist of district municipalities and unorganized parts. As in all other provinces, Indian Reserves are treated as though they were separate municipalities.

#### Census Metropolitan Areas

A number of tables in Volume I show population distributions for census metropolitan areas and their component parts. (See Tables 12, 18, 25, 30, 36, 43, 58 and 62.) As a guide to the locations of the satellite communities in relation to the central city, a set of reference maps for these census metropolitan areas follows the provincial series shown in the following pages of this Appendix.

It should be noted that these maps are not drawn to a uniform scale, and the precise boundaries in cases where only parts of municipalities are included in the metropolitan areas cannot always be discerned. Used in conjunction with detailed topographical maps, however, the exact parts included can usually be determined.

Although the cities of Regina and Saskatoon in the Province of Saskatchewan, are sufficiently large to be classed with other metropolitan area cities, these centres do not have substantial built-up urbanized fringe areas as in the case of the cities included as census metropolitan areas.

**Manitoba.**— Les subdivisions indiquées dans le cas du Manitoba sont des municipalités et des districts d'administration locale. Leurs limites sont indiquées sur la carte du Manitoba, et pour fins de consultation, chaque subdivision a été numérotée dans la division de recensement dans le même ordre que celui selon lequel elle paraît dans les tableaux du présent volume.

**Saskatchewan.**— Les subdivisions de la Saskatchewan sont des municipalités et des districts d'amélioration locale. Comme indication de leur emplacement, les numéros officiels de ces subdivisions paraissent dans les tableaux du présent volume et sur la carte de référence de la Saskatchewan.

**Alberta.**— Les subdivisions de l'Alberta sont des districts municipaux et des districts d'amélioration. Ces districts sont indiqués sur la carte de référence de l'Alberta dans le présent appendice d'après leurs limites à l'époque du recensement de 1941. Il a fallu se servir des limites de 1941 pour le recensement de 1951 à cause du grand nombre de ces districts qu'ont été réorganisés au cours des dernières années. On n'a pu tenir compte de ces changements dans l'organisation des régions de dénombrement et la préparation des tableaux du recensement de 1951 et de maintenir à la fois la comparabilité avec les recensements antérieurs. Un tableau spécial, préparé de façon à indiquer la population de l'Alberta d'après les divisions municipales telles qu'elles étaient constituées à l'époque du recensement de 1951, paraît dans l'Appendice B, ainsi qu'une carte qui indique leurs limites au 1<sup>er</sup> juin 1951.

**Colombie-Britannique.**— Les divisions et subdivisions de recensement de la Colombie-Britannique ont été établies en 1931. En se reportant au tableau 7, par exemple, (voir page 7-44) on remarquera que les subdivisions indiquées sur la carte de référence de la Colombie-Britannique sont constituées, en plus de villes et de villages érigés en municipalités, de municipalités de district et de régions non organisées. Comme dans toutes les autres provinces, les réserves indiennes sont considérées comme des municipalités distinctes.

#### Zones métropolitaines de recensement

Un certain nombre de tableaux du volume I montrent la répartition de la population par zones métropolitaines de recensement et d'après les parties constituantes de celles-ci. (Voir les tableaux 12, 18, 25, 30, 36, 43, 58 et 62.) Comme indication de l'emplacement des collectivités satellites par rapport à la cité centrale, il existe une série de cartes de référence, pour ces zones métropolitaines de recensement, qui paraît à la suite des cartes provinciales des pages suivantes du présent appendice.

Il est à remarquer que ces cartes ne sont pas tracées suivant une échelle uniforme et qu'il n'est pas toujours possible de discerner les limites précises dans le cas où des parties de municipalités seulement sont comprises dans les zones métropolitaines. À l'aide, cependant, de cartes topographiques détaillées, on peut d'ordinaire déterminer les parties exactes qui sont comprises.

Bien que les villes de Regina et Saskatoon en Saskatchewan soient suffisamment importantes pour être classées avec d'autres villes de zones métropolitaines, ces centres ne possèdent pas de grandes agglomérations de banlieue urbanisées comme il arrive dans le cas des cités appelées zones métropolitaines de recensement.

# Population Totals and Index Maps of Census Tracts

Population totals from the 1951 Census are presented in the following table by census tracts. Figures from the 1941 Census covering the same area as in 1951 are given for comparative purposes. Index maps outlining the relative location of these tracts are also included in this appendix.

Census tracts provide a means of comparing social and economic factors within an urban community which are often obscured in totals for a city or metropolitan area as a whole. These statistical units are designed with a view to approximate uniformity in size and population and to the inclusion of an area which is fairly homogeneous with respect to economic status and living conditions. Since these tracts are designed as permanent areas, they are of value also in disclosing trends within sections of a community.

In Canada, census tracts were established in co-operation with local authorities requesting this type of information. Wherever possible, local census tract committees were formed to delineate these areas. To date, census tracts have been established in 14 of the larger cities of Canada extending in some cases into the metropolitan area fringe parts. These cities are as follows: Halifax, N.S.; Saint John, N.B.; Quebec and Montreal, Que.; Ottawa, Toronto and Windsor, Ont.; Winnipeg, Man.; Regina and Saskatoon, Sask.; Edmonton and Calgary, Alta.; and Victoria and Vancouver, B.C.

In addition to the following table showing population totals, a separate report has been issued for each of the above cities presenting basic population, housing and labour force characteristics by census tracts. This detailed information does not appear in the census volumes. In these bulletins the population of each tract is classified by such characteristics as sex, age, marital status, origin, religion, and years of schooling. Household data show the numbers of persons and families per household as well as the number of households with lodgers. The number of children in families and ages of children are the main classifications of family information. In addition median earnings of wage-earner family heads are shown for each census tract.

Housing data based on the 20 per cent housing sample, include classifications by type of dwelling, rooms per dwelling, tenure, median rent and year of occupancy. The numbers of dwellings which possess such household facilities as running water, washing machines, vacuum cleaners, telephones, radios, etc., are also shown.

The labour force population is classified in the census tract bulletins by employment status during the week ending June 2, 1951; class of worker, occupational group and earnings of wage-earners. The classification by employment status groups the experienced labour force under three main headings (viz. working, with a job but not at work, and looking for work) while under the class of worker caption distinction is made between persons operating a farm or business as employers or on their own account, and also persons employed for salary or wages or in a "no-pay" capacity. The population of each census tract is further classified according to eleven separate occupational groupings and five broad earnings groups for persons employed as wage-earners.

# Chiffres de la population et cartes-index des secteurs de recensement

Le tableau qui suit donne les chiffres de la population par secteur de recensement, tirés du recensement de 1951. Les chiffres du recensement de 1941 relatifs à la même superficie qu'en 1951 sont donnés pour fins de comparaison. L'appendice comprend aussi des cartes-index qui montrent la délimitation des secteurs.

Les secteurs de recensement offrent un moyen de comparer, au sein d'une collectivité urbaine, les facteurs sociaux et économiques qu'on ne saurait, souvent, déceler dans les totaux pour une ville ou une zone métropolitaine en général. Ces subdivisions statistiques sont établies de manière à présenter un caractère à peu près uniforme quant à la superficie et la population et à embrasser une région assez homogène en ce qui concerne la situation économique et les conditions de vie. Comme ces secteurs sont appelés à demeurer en permanence, ils peuvent aussi faire connaître les tendances dans les diverses sections d'une collectivité.

Au Canada, les secteurs de recensement ont été établis en collaboration avec les autorités locales qui réclamaient ce genre de renseignements. Partout où il a été possible de le faire des commissions locales ont été créées en vue de délimiter ces secteurs. Jusqu'à maintenant, on en a établis dans 14 des principales villes du Canada; ils s'étendent parfois jusqu'aux banlieues de la zone métropolitaine. Ces villes sont: Halifax (N.-É.); Saint-Jean (N.-B.); Québec et Montréal (P.-Q.); Ottawa, Toronto et Windsor (Ont.); Winnipeg (Man.); Regina et Saskatoon (Sask.); Edmonton et Calgary (Alb.); et Victoria et Vancouver (C.-B.).

Outre le tableau ci-dessous, qui donne le total de la population, on a publié pour chacune de ces villes un rapport séparé donnant les caractéristiques fondamentales de la population, du logement et de la main-d'œuvre, par secteur de recensement. Ces renseignements détaillés ne paraissent pas dans les volumes du recensement. Dans ces rapports, la population de chaque secteur est classée selon certaines caractéristiques telles que le sexe, l'âge, l'état matrimonial, l'origine, la religion et les années d'école. Les renseignements sur les ménages donnent le nombre de personnes et de familles par ménage, ainsi que le nombre de ménages qui comptent des chambreurs. Le nombre d'enfants dans les familles et l'âge des enfants sont les principaux renseignements donnés sur les familles. En plus, le gain médian des chefs de ménage salariés est donné pour chaque secteur de recensement.

Les chiffres relatifs au logement et fondés sur l'échantillon de 20 p. 100 des habitations ont trait au genre de logement, au nombre de pièces par logement, au mode d'occupation, au loyer médian et à la première année d'occupation. Ils donnent aussi le nombre de logements pourvus de certaines commodités, comme l'eau courante, les lessiveuses, les aspirateurs électriques, le téléphone, les appareils de radio, etc.

Dans les bulletins sur les secteurs de recensement, la main-d'œuvre est classée selon la situation dans l'emploi durant la semaine terminée le 2 juin 1951, selon la classe du travailleur, selon l'occupation et selon le gain des salariés. La rubrique de la situation dans l'emploi divise le groupe de la main-d'œuvre expérimentée en trois principales catégories (à savoir, au travail, employé mais non au travail, et en quête de travail) tandis que la rubrique de la classe de travailleur fait la distinction entre les personnes qui exploitaient une ferme ou un commerce à titre d'employeurs ou pour leur propre compte et entre les personnes employées à salaire ou travaillant sans rémunération. La population de chaque secteur est aussi recueillie selon les onze groupes d'occupations distincts et les quatre principales classes de rémunération des salariés.

**RÉORGANISATION DES MUNICIPALITÉS EN ALBERTA**

## APPENDIX B

## Reorganization of Municipal Units in Alberta

Since the 1941 Census, the municipal districts and improvement districts of the Province of Alberta have been completely reorganized. The changes which took place between 1941 and 1946 are shown in Volume I of the 1946 Census of the Prairie Provinces at Table 6A, pages 415-430.

Following the 1946 Census, further extensive revisions were made in the municipal boundaries of Alberta, which extended through the 1951 census period. Because of the continuing nature of this municipal reorganization, it was not possible to incorporate the changes which took place between 1941 and 1951 in the planning operations and tabulations of the 1951 Census and still maintain comparability with earlier censuses. It was decided, therefore, to use the boundaries of the municipal districts and improvement districts of Alberta as they were constituted in 1941. In the next census it is planned to obtain historical comparability by tying these figures in directly with the latest municipal boundaries and bridging the temporary changes of the 1941-51 decade.

To show the population totals of the municipal units of Alberta according to their boundaries as of June 1, 1951, the following special table has been compiled mainly by grouping the populations of the small township subdivisions to conform to these boundaries. The table is arranged to show the 1941 districts, or parts, included in each of the reorganized areas. The following example illustrates this arrangement:

16. Bright	1951 Municipal District of Bright
39. Kerr (pt.)	1941 municipal and improvement districts, or parts thereof, forming the 1951 Municipal District of Bright.
68. I.D. (pt.)	
69. Bright	
99. Argyle (pt.)	
100. I.D. (pt.)	

A map outlining the municipal boundaries of Alberta in 1951 is shown as part of this Appendix. The 1941 boundaries are shown on the map of Alberta in Appendix A, at Page A-11.

## APPENDICE B

## Réorganisation des municipalités en Alberta

Depuis le recensement de 1941, les districts municipaux et les districts d'amélioration de la province d'Alberta ont été complètement réorganisés. Les changements apportés de 1941 à 1946 sont indiqués dans le volume I du recensement des provinces des Prairies de 1946, au tableau 6A, pages 415-430.

A la suite du recensement de 1946, d'autres modifications importantes ont été apportées aux limites des municipalités d'Alberta, modifications qui étaient encore en cours lors du recensement de 1951. En raison du caractère de continuité de cette réorganisation municipale, il a été impossible de tenir compte des changements survenus de 1941 à 1951 dans l'organisation et les calculs du recensement de 1951 tout en maintenant la comparabilité avec les recensements antérieurs. Il a donc été décidé d'utiliser les limites des districts municipaux et des districts d'amélioration de l'Alberta telles qu'elles étaient établies en 1941. Au prochain recensement, on projette d'obtenir la comparabilité historique en attribuant directement ces chiffres aux municipalités, conformément aux limites les plus récentes, et en y rattachant les modifications temporaires de la période 1941-1951.

Afin d'indiquer la population des municipalités d'Alberta d'après les limites qu'elles avaient le 1<sup>er</sup> juin 1951, on a dressé le tableau spécial ci-dessous en groupant la population des petites subdivisions des townships, de façon à tenir compte de ces limites. Le tableau montre les districts de 1941, ou des parties de ces districts, compris dans chacune des régions réorganisées. L'exemple suivant illustre cet agencement.

16. Bright	District municipal de Bright en 1951
39. Kerr (partie)	Districts municipaux et d'amélioration de 1941, ou parties de ces districts, formant le district municipal de Bright en 1951.
68. D.A. (partie)	
Bright	
99. Argyle (partie)	
100. D.A. (partie)	

On trouvera, au présent appendice, une carte indiquant les limites des municipalités de l'Alberta en 1951. Les limites de 1941 sont indiquées sur une carte de l'appendice A, page A-11.
